SEED Newsletter

Vol. 1.1

Merry Christmas!

On the 25th day of December each year, Christians and others across the globe celebrate the birth and ministry of Baby Jesus the CHRIST. Team SEED wishes its partners, vendors, employees, candidate respondents, their family members and the entirety of Christendom, a life filled with happiness and the incontrovertible joy of GOD. May we experience happiness and joy as we celebrate Christmas! May we receive gladness and good tidings as we usher in the New Year! The Christmas season is the time of the year where expressions of thanksgiving and love are made to our

nearest and dearest, and to all those we come in contact with as we perform our daily activities. This year, let's go beyond the exchange of gifts and pleasantries. This year, let's aspire to be a true and essential blessing to our nearest and dearest. This year, let's strive to be the true and essential ingredient that makes a difference in the lives of people; salt of the earth, light of the world (Matthew 5: 13-14).

SEEED Projects

SEEED has had a number of significant projects in 2019. SEEED is the primary consulting firm providing reconciliation, training and support of a healthcare information technology (HIT) application to medical practitioners at one of the leading home health agencies in the Houston Greater Area. SEEED, in concert with various HIT consulting organizations, provides training and support of electronic medical record (EMR) applications (EPIC, CERNER, AllScripts etc.) to a broad spectrum of clinical and ancillary staff at multiple healthcare facilities (hospitals [teaching, non-teaching], clinics and home health organization's etc.) across the continental United States. Furthermore, researchers at SEEED are partnering with IGI Global: <https://www.igi-global.com/> for the publication of two research books. These academic projects entitled "Evaluation of Economic Progression Across Middle-income Americans: Narratives and Research Perspectives (EEPAMANRP)" and "Exploring the Efficacy and Beneficence of Complementary And Alternative Medicinal Products in Disease Therapy (EEBCAMPDT)" have been approved for publication in 2020. The recruitment of candidate respondents and the send-out of questionnaires per the

"It is our expectation that targets for both projects will be met in accordance with the editorial schedule of deadlines"

- Eshiet and Moore (Eds.)

research design is still on-going for the former, the acceptance of book chapter submissions is in progress for the later. In a recent statement, Eshiet and Moore (Eds.) reiterated that "it is our expectation that targets for both projects will be met in accordance with the editorial schedule of deadlines." Team SEEED implores candidate respondents to complete and submit questionnaires with a renewed sense of urgency. We are thankful and grateful for the

responses we have received thus far. Team SEEED solicits book chapter contributions to project EEBCAMPDT.

Book EEPAMANRP is a soft study desirous of measuring the economic

progression of middle-income Americans today; it intends to capture and mirror the "mindset" of middle-income earners in America's body polity. It is the considered opinion of the authors that the circumstances of one's birth and life experiences are primary predicates of an individual's perception and perspective of emerging and unfolding trends and events in contemporary society.

The primary objective of project EEBCampDT is to illustrate, and perhaps demonstrate one or more instances where a continuum of research findings on certain complementary and medicinal products (CAM) are indicative of the potential of CAM in the treatment of multiple diseases and comorbidities. Researchers and practitioners are invited to submit book chapter proposals etc: <https://www.igi-global.com/publish/call-for-papers/call-details/4155>. There are no submission or acceptance fees for manuscripts submitted to this publication.

The Light Bulb program (TLB):

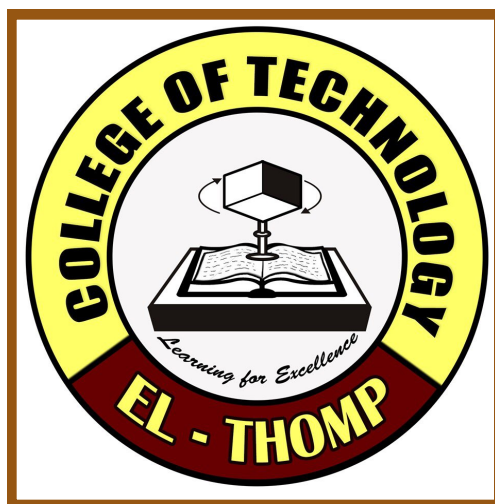

In the Spring of 2014, SEED facilitated a collaborative partnership with EL-THOMP College of Technology now renamed EL-THOMP Polytechnic, Nigeria. This initiative tagged "The Light Bulb program (TLB)" is geared towards re-engineering young minds with the singular objective of retooling the thought process of the next generation of leaders and policy makers. TLB aspires to provide a platform where the transfer of culture, technology and knowledge is burnished.

EL-THOMP Polytechnic: <https://elthomportal.com/>, home to over two hundred young adults enrolled in liberal arts, science, technology and engineering programs, is a post-secondary institution located in Abak, Akwa-Ibom State, Nigeria. Akwa-Ibom is a member state of Nigeria's Niger Delta region: https://theseeedblog.files.wordpress.com/2014/04/portfolio_el-thomp-04-10-2014.pdf

theseeedblog.files.wordpress.com/2014/04/portfolio_el-thomp-04-10-2014.pdf

"EL-THOMP employs a two-pronged methodology that presents a holistic approach to the intellectual and spiritual well-being of the student. This is encapsulated in our curriculum, and is distilled into the programs and courses we offer" - Professor Israel T. Eshiet, Founder, EL-THOMP Polytechnic

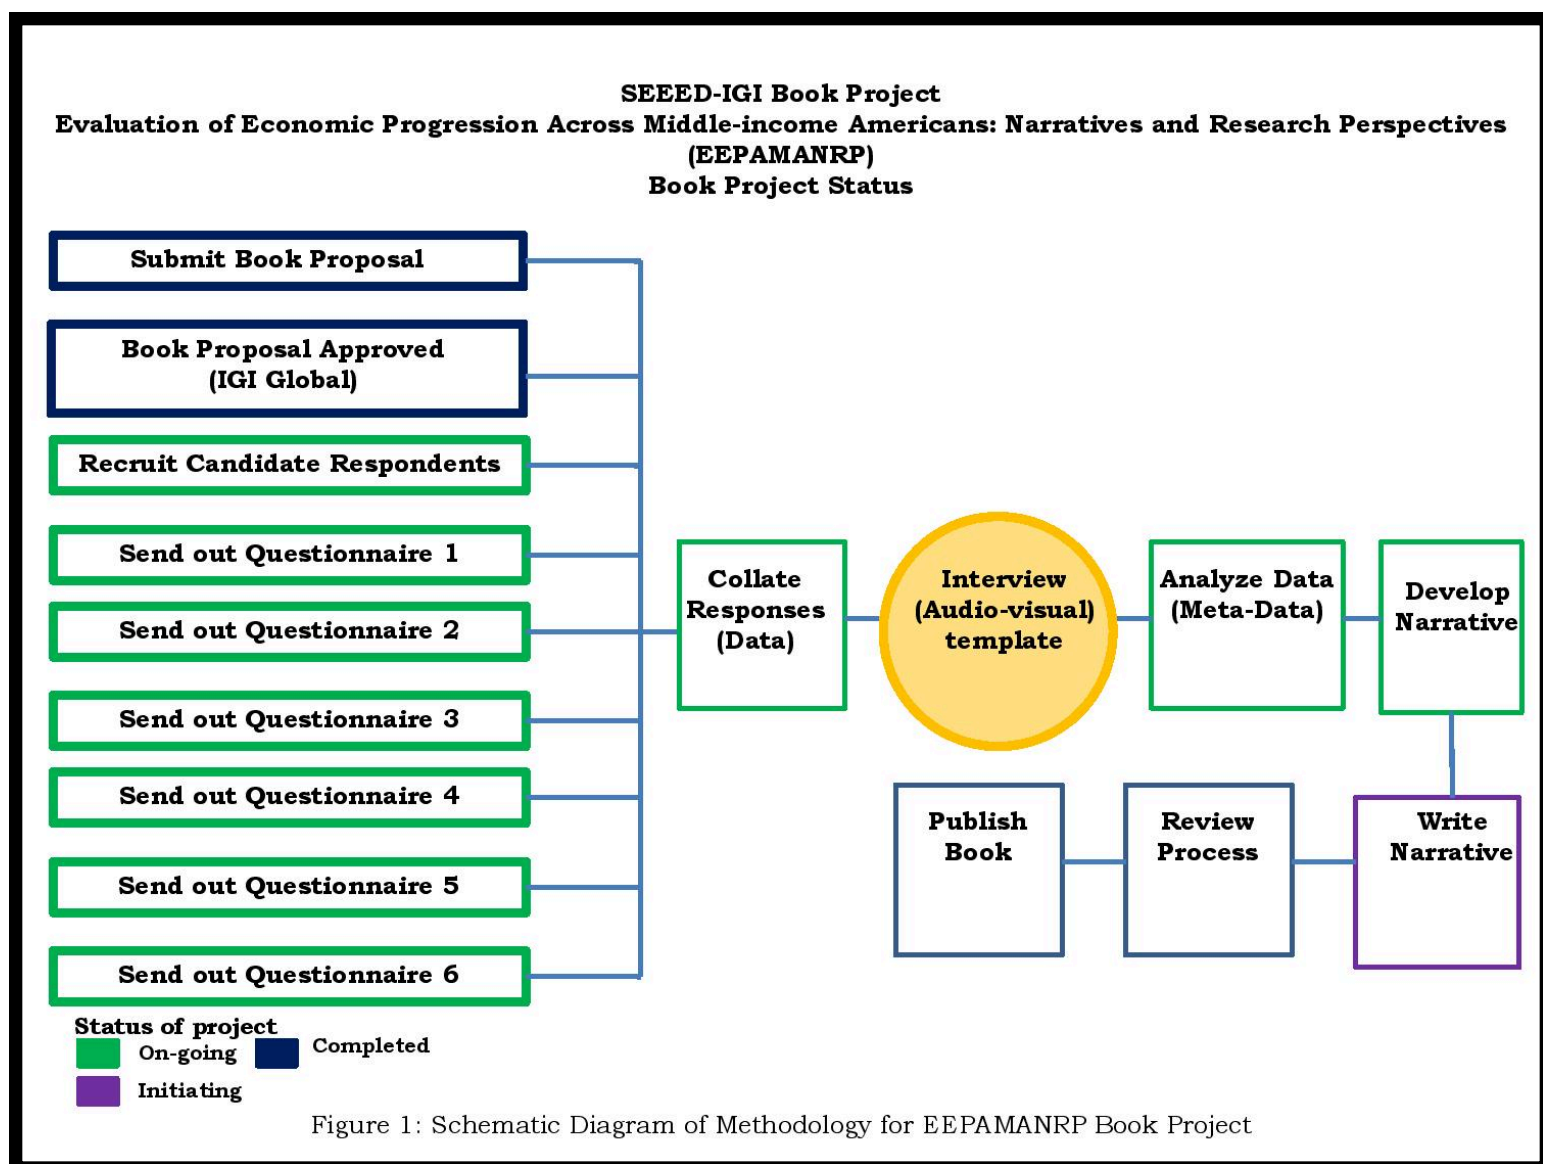

Other SEED programs include:

- The SEED Foundation
- Pray for America Today Initiative (PfAT!)
- Aspects of Arts
- Spectrum Wheels

Update on SEED-IGI Book project:

Evaluation of Economic Progression Across Middle-income Americans: Narratives and Research Perspectives (EEPAMANRP).

The send-out of questionnaires (Q1-6: consent, demographics, income, education, socio-religious, dynamic politics) is on-going. The collation of candidate responses, analysis of meta-data, and the development and writing of subject narratives have been initiated and are on-going (Figure 1: schematic diagram of methodology for EEPAMANRP book project).

Points to ponder.....

IGI Global: Evaluation of Economic Progression of Middle-income Americans: Narratives and Research Perspectives (EEPAMANRP)

Q1. 8. By clicking the "Yes" button in response to question 8, you affirm that you have carefully read through and thoroughly understand the preface to EEPAMANRP; you consent to participate in this book project willingly and without duress?

● Answer Choices ● Yes ● No

Figure 2

- The authors affirm that every participant had an excellent understanding of the premise of the study.
- Each candidate respondent voluntarily consented to be a part of project EEPAMANRP..

Close to one hundred invitations have been sent out to candidates who meet the strict eligibility criteria of this study. Candidates must be American citizens and must earn an annual income of \geq \$20,000 USD and above. Although responses have been consistent, we are yet to meet the target numbers required to initiate all segments of project EEPAMANRP. The authors humbly request that respondents complete and submit questionnaires (Q1-6) received fastidiously and expeditiously.

- 93.5% of respondents were determined to be in the American workforce.
- While 6.5% of respondents may have been in the workforce at some point, they were not a part of the workforce at the time they completed the survey.

IGI Global: Evaluation of Economic Progression Across Middle-Income Americans: Narratives and Research Perspectives (EEPAMANRP)

Q3.1. How long have you been a part of the American workforce?

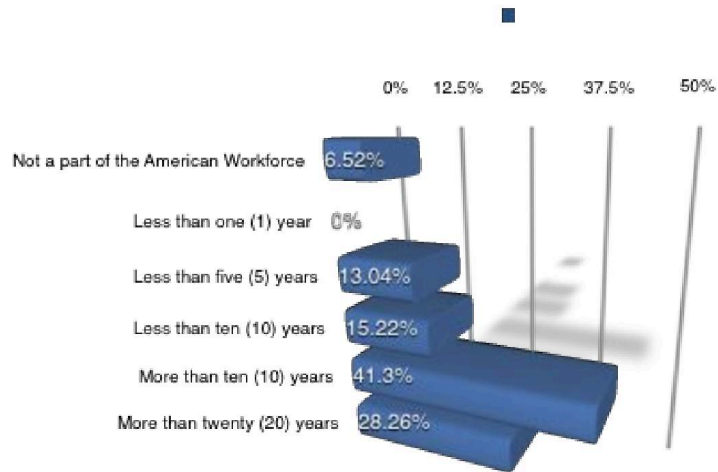

Figure 3

Can you believe this?

- A plurality of respondents are traditional Christian conservatives.
- Progressives and liberals constitute a significant portion of the surveyed population.

IGI Global: Exploring the Economic Progression Across Middle-income Americans: Narratives and Research Perspectives (EEPAMANRP)

Q6.2: What description aptly describes your political ideology?

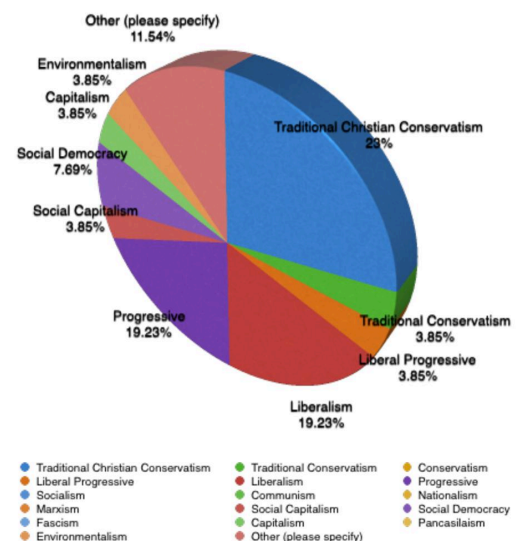

Figure 4

IGI Global: Evaluation of Economic Progression of Middle-income Americans: Narratives and Research Perspectives (EEPAMANRP)

Q5.2. To your mind, what is the world's (people of the world) leading contemporary hot button issue today?

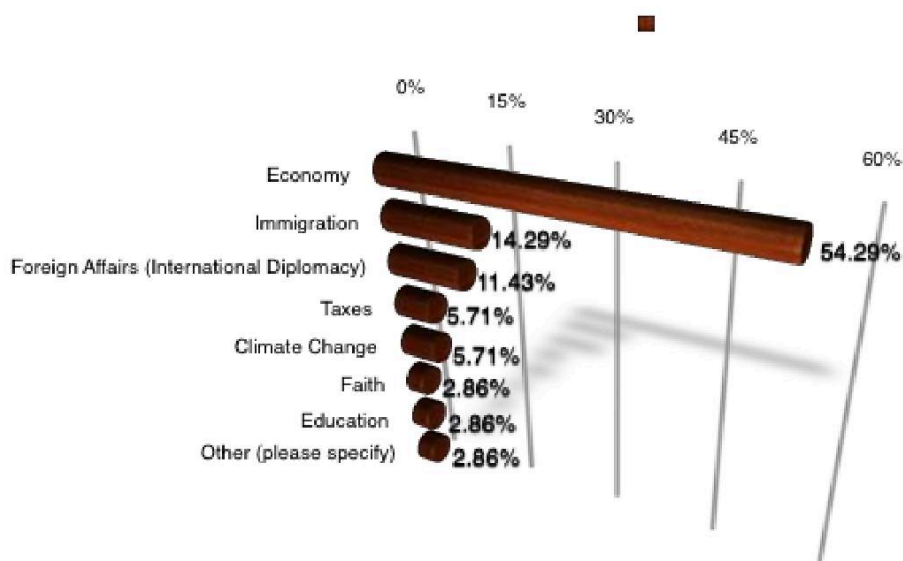

Figure 5

- Overwhelmingly, respondents believe the economy is the leading hot button issue in contemporary America.
- Immigration and foreign affairs may be feeble contenders. They are of secondary interest to respondents.
- Taxes, climate change, faith, education etc., generated a modicum of interest.

Merry Christmas!!!
